Gentlemen:

This refers to the special safety inspection conducted by L. W. Shatterly of this office on June 21 through 25, 1982, of activities at Reuter-Stokes, Inc. and to the discussion of our findings with you and Mr. George Palko at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your licenses. This special inspection was performed in conjunction with an inspection of your activities as a vendor of instruments to the nuclear power industry. The inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

During this inspection, certain of your activities involving license SNM-1826, separate from your vendor activities, appeared to be in non-compliance with NRC requirements, as described in the enclosed Appendix. The inspection showed that action had been taken to correct the identified noncompliance and to prevent recurrence. Consequently, no reply to this noncompliance is required and we have no further questions regarding this matter at this time. The results of the inspection of your vendor activities will be presented to you in separate correspondence by representatives of the Nuclear Regulatory Commission - Region IV.
