Docket Numbers 50-369 and -370  
Catawba Nuclear Station  
Docket Numbers 50-413 and -414  
Revised Proprietary Designation of  
BAW-10173 (TACS 73769/73770/73771/73772)

By letter dated March 20, 1989, Duke Power Company submitted the subject Topical Report as a proprietary document. On January 30, 1991, various telecons between NRC, Duke, and B&W Fuel Company resulted in a redesignation of the proprietary information contained in the Topical Report and related correspondence. Therefore, the attached material is provided to properly identify the proprietary information related to the subject Topical Report. The proprietary information is in three parts:

Attachment I indicates all of the information contained in BAW-10173, through Revision 2, which is proprietary; the remainder of the Topical Report may be considered non-proprietary.

Attachment II identifies proprietary information from a June 7, 1990 response to a request for additional information. The remainder of that submittal may be considered non-proprietary.

Attachment III contains a revised Table 5-1 of BAW-10173. As is the case with the original table in the Topical Report, the entire "Selection" column is considered proprietary.

Appropriately designated proprietary and non-proprietary versions of the Topical Report will be issued following receipt of the Safety Evaluation Report.

If there are any questions, please call Scott Gewehr at (704) 373-7581.

Very truly yours,

M. S. Tuckman, Vice President  
Nuclear Operations
