License No. 21-18525-01  
Docket No. 03013827

Dear Mr. Caniano:

This letter is in reference to the violation noted during the agency inspection of our facility on December 17, 1990.

Our practice in the past has been to send an interdepartmental memo annually to ancillary personnel. This memo described in General Radiation Hazards and Associated Risks. We will continue to utilize this method on an annual basis, to all ancillary personnel.

In addition, a special training session has been scheduled for February 1991, specifically for the nursing department. Again, we will perform this training on an annual basis. Documentation pertaining to all training will be maintained for future agency review.

I hope this information meets with agency approval. If you should need any further information, please contact me.

Sincerely,

Gilbert Daniel, M.D. RSO
