Re: Ruth In-Situ Uranium Project TFN 2 5/123

Dear Mr. Catchpole:

Enclosed are copies of your approved Commercial In-Situ Permit, License and the approved bond rider for the above referenced project. Permit No. 631 has been assigned to this project. Please refer to this permit number when discussing this project in future correspondence.

A complete and updated copy of the permit must be maintained at the mine office, and at the LQD offices in Cheyenne and Sheridan. Please make arrangements to have someone from your office come to Cheyenne within 30 days to incorporate the permit application materials into the approved permit document, complete index sheets for each volume for microfilming and dispose of the duplicate copy of the permit application. Redundant information not collected within the next 30 days will be destroyed.

As my staff has discussed with you the following additional permit condition has been added to your permit application:

All evaporation ponds shall have a WQD approved monitoring plan prior to commencement of operations.
