Atlanta, Georgia 30323

Re: Docket No 9990002

Dear Mr. Cline:

In reference to your letter dated January 17, 1989, referring to DG Mouldings loss of nuclear ionizer Model No. 906 S/N's E12058, E12059, E12060 & E12071, we are responding as required by NRC.

The afore mentioned ionizers were attached to plastic moulding finishing machines. In this operation the ionizers were used to eliminate static from moulding traveling at a high rate of speed. Sometime after installation the different machines needed repairs or possibly the ionizers were dislocated from machines during repairs. The mechanic or machine operator did not think of the ionizer having a violation under (10 CFR 31.5) and units were apparently misplaced inadvertently.

To correct the loss violation of DG Mouldings, we would install and validate the ionized serial no. installed on each machine. During our weekly foreman's machine inspection, the operator is to indicate the location of ionizer and if it is attached to machine.

Results of the corrective action will not be affirmative until we are able to obtain and use #906 ionizers again.

One mechanic will be assigned the responsibility of repair to area where ionizers are used. Reports of ionizers will be made weekly to Plant Superintendent and to Plant Manager. Machine operators will be instructed in the responsibility of General License (10 CFR 31.5) by Plant Superintendent.

B/22

Effective February 2, 1989, this plant should be in full compliance due to the fact we no longer are able to obtain model 906 ionizers through 3M nor have I at this date found another source for ionizers.

In answer to your question of future use of ionizers, yes we do plan to use 3M or other sources when available.

Sincerely,

A handwritten signature in cursive script, appearing to read "Hilton Greer".

Hilton Greer

BRIEFING SHEET

Scheduled: February 6, 1989  
2:00 p.m. - White Flint North - 6 B 11

Subject: Operational Events Briefing

Purpose of Briefing: To brief Director, NMSS, on Recent Operational Events.

Background Information: Monthly briefing to discuss significant events that may have high visibility, generic implications, or problems which will not be quickly resolved.

GPA and AEOD have also been requested to provide a summary of events in Agreement States and events being considered for the Abnormal Occurrence Report to Congress.

Handouts: To be distributed at the meeting if necessary.

Enclosure: List of Events

Invitees:

- R. Bernero
- M. Knapp
- R. Cunningham
- G. Sjoblom
- J. Hickey
- D. Cool
- K. Ramsey
- L. Rouse
- J. Swift
- G. Bidinger
- J. Austin
- N. McElroy
- M. Lamastra
- R. Burnett
- G. McCorkie
- C. MacDonald
- J. Greeves
- R. Browning
- B. J. Youngblood
- K. Black, AEOD
- V. Miller, SLITP
- L. Bolling, SLITP
- H. Wong, OE

NOTE: THE PROJECT MANAGER COGNIZANT FOR EACH EVENT SHOULD ATTEND THE MEETING
