December 7, 1982

Director of Nuclear Reactor Regulation
Attention: Mr. John F. Stolz
Operating Reactor Branch No. 4
Division of Operating Reactors
United States Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Stolz:

As a part of our effort to complete the Small Break LOCA Methods Program response to NUREG-0737 Item II.K.3.30, we are endorsing two B&W Topical Reports recently submitted to the Standardization and Special Products Branch. This endorsement will apply to the use of the B&W reports for Davis-Besse Nuclear Power Station Unit No. 1.

The two B&W Topical Reports are BAW-10154P "B&W Small Break LOCA ECCS Evaluation Model," and BAW-10092P Revision 3 "CRAFT-2". These reports have been copied to the Reactor Systems Branch of the NRC and should be reviewed as part of the Toledo Edison effort to resolve NRC concerns on NUREG-0737 "Small Break LOCA Methods" Item II.K.3.30.

Very truly yours,

A handwritten signature in cursive script, likely belonging to Richard P. Crouse.
