Bert Davis Regional Administrator Nuclear Regulatory Commission Region III 799 Roosevelt Road Glen Ellyn, IL 60137 St. Mary's Medical Center, Hobart - Gary Audit Report of Brachytherapy Program Dear Mr. Davis: From the point of view of the physician community and in order to insure that any future NRC investigations which may necessitate such an audit report are not wasteful of the resources of the government and the private parties involved, I urge that the final report in this matter, as indicated by the auditors, suggest the following procedures for the future. 1. That NRC investigators be aware of the nonindustrial nature of the health care delivery system and be careful to review all medical charts and documents whether maintained by the hospital or the physician before reaching conclusions; and 2. If the government intends to interject itself into the practice of medicine by requiring additional pretreatment steps of prescribing dosages, that such regulations be published and clearly disseminated to involved physicians so that, among other things, they not be accused of overutilization.
