Mail Stop 8E/EP4
Omaha, Nebraska 68102-2247

Dear Mr. Patterson:

SUBJECT: CORRECTION TO AMENDMENT NO. 155 - FORT CALHOUN STATION, UNIT NO. 1
ISSUED AUGUST 12, 1993 (TAC NO. M85116)

On August 12, 1993, in response to your application dated December 7, 1992, as supplemented by letters dated March 19, April 28, and May 14, 1993, the Commission issued Amendment No. 155 to Facility Operating License No. DPR-40 for Fort Calhoun Station, Unit No. 1. The amendment made changes to the Technical Specification (TS) and the license to increase the fuel storage capacity in the spent fuel pool to 1083 fuel assemblies.

In correction letter dated February 8, 1994, Item 10 on TS page 3-28 was corrected to change the weight percent from 4.0 to 4.2. The license condition on page 4a, Item D. specifies when the changes are effective. Item 10 in TS 2.8 is not included in the license condition. This error was made in Amendment No. 155, and has been carried forward into Amendment Nos. 158 and 160. A corrected page 2 of the license for Amendment No. 155 and a corrected attachment (license page 4a) incorporating the changes made in Amendment Nos. 158 and 160 are enclosed. We apologize for any inconvenience.

Sincerely,

ORIGINAL SIGNED BY
Steven D. Bloom, Project Manager
Project Directorate IV-1
Division of Reactor Projects III/IV/V
Office of Nuclear Reactor Regulation
