Ivan Selin, Chairman
Nuclear Regulatory Commission
Washington D.C. 20555

Dear Chairman Selin,

I am an eighth grade student at St. Ann's Academy on Tenley Circle in Washington D.C. I have recently learned of this issue through Global Response, an environmental organization.

I am writing to voice my opinion on this important issue. I have been informed that Louisiana Energy Services wants to build a factory near Homer, Louisiana. I have also been informed that this factory would be near the black communities of Forest Grove and Center Springs.

I really do not think that this is a great idea. I don't know why you would want to dump 4,000 tons of hazardous waste on these communities per year. Please talk to the people of these communities and find out how they feel about this. Please follow your heart and understand that the communities of Forest Grove and Center Springs are made up of taxpaying citizens.

Sincerely,
Joi Marie Grymes
