IVAN SELIN, Chairman
Nuclear Regulatory Commission
Washington, DC 20555

Dear Chairman Selin,

I am writing to you through global response, about the building of a powerplant, in forest Grove and Center Springs Louisiana. Many people do not want this powerplant, and I suggest you ask them if they do. Most powerplants are built in low income minority communities. And if you force these people to live with it, it's just environmental racism. The LES plant (Louisiana Energy Services), will dump 4,000 tons of waste a year, just to fuel the powerplant. Thank-you for your time.

Sincerely,

MIKE PINEIRO
