CLEVELAND ELECTRIC ILLUMINATING
COMPANY, et al.

Docket Nos. 50-440-OL
50-441-OL

SERVED DEC 10 1982

(Perry Nuclear Power Plant, Units 1 & 2)

December 10, 1982

MEMORANDUM

The following interpretations of OCRE interrogatories on issue #8 were stated by the Board during a conference call of all parties held December 9, 1982:

1. What, if anything, has the staff done to develop different scenarios about a TMI-type accident (a loss of coolant accident, compounded by one or more human errors) that results in core uncover and hydrogen generation?
2. What, if anything, has the staff done to determine whether such scenarios are credible?
3. Discuss whatever doubts the staff has about whether a TMI-type accident could occur at Perry or at similar BWR reactors.
4. Provide documents and analyses that are not available in the docket room but bear on the above questions and cite publicly available documents.
5. Provide the name of any staff person who, in the course of work for the NRC, prepared a memorandum or other written document suggesting that there are one or more credible TMI-type accident scenarios for Perry or for similar BWR reactors.
