Mr. Cecil O. Thomas, Chief  
Standardization and Special Projects Branch  
Division of Licensing  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Phillips Building  
7920 Norfolk Avenue  
Bethesda, MD 20014

Dear Mr. Thomas:

WCAP-10170, "Emergency Response Facilities Design and V&V Process," has been submitted under a separate cover for NRC review and approval.

This "Topical Report" describes the design process and verification and validation process which will be used by Westinghouse for the design and production of the Safety Parameter Display System (SPDS). Your review of this topical report will be concomitant with your review of the design basis and functional requirements for the SPDS.

As stated in an earlier letter (Rahe to Paulson, NS-EPR-2684, November 15, 1982) we believe that issue at the earliest possible time of a Safety Evaluation Report (SER) covering the above items would be beneficial to the NRC, Licensees and Westinghouse.

If you have any questions on this subject, please feel free to call Mr. D. H. Rawlins, Manager of Product Licensing, a member of my staff, at (412) 373-5282.

Very truly yours,

E. P. Rahe, Jr., Manager  
Nuclear Safety Department
