Gentlemen:

This refers to the inspection conducted by Messrs. C. C. Warren and M. A. Satorius and Ms. L. J. Smith, of this office December 8, 1990, through January 17, 1991. The inspection included a review of activities authorized for your Arkansas Nuclear One (ANO), Units 1 and 2, facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Included are onsite event followup, operational safety verification, surveillance, maintenance, modification installation, outage activities, review of previous inspection findings, and followup of licensee action on licensee event reports. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations of activities in progress.

Within the areas inspected, no violations or deviations were identified. During this inspection period, several weaknesses were observed with the guidance provided to control postmaintenance testing activities.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

ORIGINAL SIGNED BY
SAMUEL J. COLLINS

Samuel J. Collins, Director
Division of Reactor Projects
