Ivan Selin Chairman
Nuclear Regulatory Commission
Washington, D.C. 20535

Dear Chairman Selin;

I, as an eighth grade student at
St. Ann's Academy have recently
read an article in the paper Global
Response. I personally feel that you
should not let them put this plant
in the peoples' community because this
will cause great damage, and destruction
caused by the plant. These people
will most likely be very well organized
to try to get this plant out of their
neighborhood if it happened to be put there.
The plant will cause more people to be

sick, and not able to keep their basic care as simple as it was before. If the people become extremely ill there will not be enough money to keep them either well or alive. This plant will become a health problem, and a financial problem. The plant will take up the space that the children have to play in, and it might be too close to the rest of the play area for the children.

Sincerely,

YAMSIKA N. HENDERSON

P.S. Please think
about this hard.
