Ivan Selin, Chairman  
Nuclear Regulator Commission  
Washington D.C. 20555

Dear Chairman Selin,  
Just recently, I was reading the NRC newsletter and read the article about the environmental racism, the company building the uranium plant near a black minority area. This process should be stopped immediately. The company should build the plant somewhere in the Midwest where not a lot of people live. They should not build it there because those people deserve a fair chance with their health just as well as anyone else.

Sincerely,  
Logan
