

NOTICE OF VIOLATION

Williams and Works, Inc.
Grand Rapids, Michigan

License No. 21-15271-02
Docket No. 030-09538

As a result of the inspection conducted on January 16, 1991, and in accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C, (1990) (Enforcement Policy) the following violations were identified:

1. License Condition No. 12(A)(1) requires that sealed sources be tested for leakage and/or contamination at intervals not to exceed six months.

Contrary to the above, the licensee failed to test sealed sources for leakage and/or contamination at intervals not to exceed six months. Specifically, during the period February 1990 to January 1991, three Troxler Model 3411 moisture/density gauges were not leak tested.

This is a Severity Level IV violation (Supplement VI).

2. License Condition No. 15 requires the licensee to conduct a physical inventory every six months to account for all gauges received and possessed under the license.

Contrary to the above, since approximately March 1986, the licensee has failed to conduct a physical inventory every six months to account for all gauges received and possessed under the license.

This is a Severity Level IV violation (Supplement VI).

3. License Condition No. 18 requires that the licensee conduct its program in accordance with the statements, representations, and procedures contained in certain referenced documents.

Item 9 of the referenced application dated June 13, 1988, specifies the designated storage area for the moisture/density gauges as 5555 Glenwood Hills Boulevard.

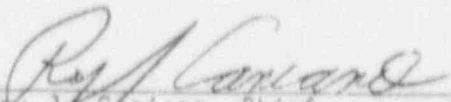

Contrary to the above, on the date of the inspection, two of the licensee's moisture/density gauges were being stored at 5730 Eagle Drive instead of the designated storage area at 5555 Glenwood Hills Boulevard.

This is a Severity Level IV violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, you are required to submit to this office within thirty days of this Notice a written statement or explanation in reply, including for each violation: (1) the corrective steps that have been taken and the results achieved; (2) the corrective steps that will be taken to avoid further violations; and (3) the date when full compliance will be achieved. Consideration may be given to extending your response time for good cause shown.
