October 9, 1990

Mr. Ray Cilimberg
United States Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Cilimberg:

This letter is to document our telephone conversation of 10-9-90.

Mr. Marvin Thomas, President of A & G Engineering, on 10-8-90, was quite alarmed when I made him aware of the fact that two (2) utilities had contacted me on a letter addressed to Mr. Thomas from the U.S.N.R.C. which he had not received. Please refer to Docket No. 99901006/89-01.

Again, on 10-9-90, a third utility contacted us to discuss the letter.

This was quite embarrassing when several of our valued customers called us wanting to discuss our response to a public document which we had not received.

Ray, thank you for your legitimate concern in this matter and your fax to A & G Engineering of 10-9-90. We appreciate your taking this matter to your branch chief.

Best Regards,

John Thalasinis
Quality Assurance Manager

cc: Marvin E. Thomas
