

DEC 29 1982

Docket Nos. 50-295/304

Commonwealth Edison Company
ATTN: Mr. Louis O. DelGeorge
Director of Nuclear Licensing
Post Office Box 767
Chicago, Illinois 60690

Gentlemen:

By an application dated November 7, 1980, your Company requested changes to the Technical Specifications for Zion Unit Nos. 1 and 2 to assure redundancy in decay heat removal capability in accordance with an NRC letter dated June 11, 1980. On June 22, 1981, the NRC's Division of Licensing (DL) staff completed their review of this application and issued Amendment No. 65 to License No. DPR-39 and No. 62 to License No. DPR-48. The DL staff's final fee determination pursuant to 10 CFR 170.22 was that Classes III and I fees were applicable for this request in lieu of the Classes II and I that your Company paid because the review was more than administrative or pro forma in nature.

Through an administrative oversight, our office never requested the additional sum of \$2,800 to complete the fees for this application. Consequently, we are now requesting that your Company remit an additional \$2,800 to this office for your November 7, 1980 application.

Please accept our apology for the untimely manner in which we are bringing this matter to your attention.

Sincerely,

/s/

Reba M. Diggs
Facilities Program Coordinator
License Fee Management Branch
