Maryland National Bank Building
7735 Old Georgetown Road
Bethesda, Maryland

Mr. Harold Denton
Reactor Systems Branch/Division of Systems Integration/
Office of NRR
Phillips Building
7920 Norfolk Avenue
Bethesda, Maryland

Gentlemen:

Subject: GESSAR II Docket STN 50-447

This letter is to request a meeting on January 5 to discuss the GESSAR review status and confirm the committed schedule for an SER in March 1983 and an FDA in May 1983.

The GE attendees would be:

- A. P. Bray, Vice President and General Manager,
Nuclear Power Systems Division
- G. G. Sherwood, Manager, Safety and Licensing Operation
- R. Villa, Manager, BWR Standardization

The requested NRC attendees are:

- Mr. W. J. Dircks
- Mr. H. R. Denton
- Mr. D. G. Eisenhut
- Dr. R. Mattson
- Mr. R. H. Vollmer

The proposed agenda would be:

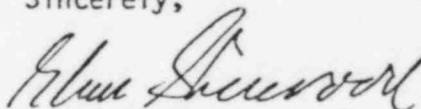

- 1) GESSAR review status and schedule . . . NRR

- 2) Any open issues for the Nuclear Island FDA . . . NRR
- 3) GE report on GESSAR review . . . R. Villa
- 4) NRC requirements for the Severe Accident FDA . . . NRR
- 5) GE plan for meeting the Severe Accident requirements . . . R. Villa

Larry Gifford and Robert Ketchel will work out the arrangements for the meeting. They will also be in attendance.

With the review of GESSAR in its final phase for the FDA, this meeting should provide a good opportunity for a management overview. This is a very important program to GE, and we believe to the NRC and industry as well, as it is the first nuclear island standard plant to be considered for final design approval.

Sincerely,

Glenn G. Sherwood, Manager
Nuclear Safety & Licensing Operation

j
