

DEC 28 1982

States Attorney of LaSalle  
County  
Etna Road  
Ottawa, IL 61350

Gentlemen:

On July 2, 1982, we provided you with a statement of concern from an individual on construction activities at the LaSalle site. Following our issuance of the special inspection report on July 19, 1982, we received additional concerns regarding activities at the LaSalle site. The following concerns were raised:

"The NRC investigators did not pursue a number of issues I raised for investigation. For example, I told them about a death threat I received because of suspicions that I told a TV station about the 55-gallon drum. I even identified the man who threatened me. Nothing has been done to follow up, . . ."

"I tried to disclose to the NRC how records on core drilling were whited-out . . ."

With respect to the second statement, the individual indicated that records were altered (whited-out) so that Commonwealth Edison would be billed twice for the same drilled hole.

During our initial discussion with the individual and again during a more recent contact with him, he stated that the issues of the death threat and alteration of records had been made known to local authorities.

We are providing this information to you for whatever action you deem appropriate. If you need any additional information regarding this matter, please contact Nick Jackiw of my staff (312/932-2697).

Sincerely,

Charles E. Norelius, Director  
Division of Engineering and  
Technical Programs
