Re: Docket No. 03008251  
License No. 21-14920-01

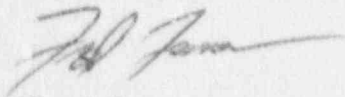

Dear Mr. Davis:

Our license was specifically written such that we would be exempt from the financial assurance requirements of 10 CFR 30.35. Please see ammendment No. 14, Conditions 23 and 24. We also reference our letter of May 9, 1990 to Mr. John Jones who had questions regarding this issue.

If there is some specific technicalty that we have overlooked, please inform us so that we may address the situation. However, the way our license is currently written, it is our understanding that we are exempt from any financial assurance requirements.

We affirm that the above statements, to the best of our knowledge, are true.

Sincerely,

Fred Fenner  
Manager, Nuclear Studies
