SUBJECT: Calvert Cliffs Nuclear Power Plant
Unit Nos. 1 & 2; Docket Nos. 50-317 & 50-318
Corrections to License Amendment Pages

REFERENCE: (a) Letter from Mr. D. G. McDonald, Jr. (NRC) to Mr. G. C. Creel (BG&E), dated December 4, 1990, "Issuance of Amendments (No. 149/130)"

Gentlemen:

Reference (a) issued License Amendments 149 and 130 for Calvert Cliffs Unit 1 and Unit 2, respectively. The amendments revised the Technical Specifications by changing the Engineered Safety Features Response Time for Auxiliary Feedwater (AFW) Pumps. These response times are found on the second page of two-page Table 3.3-5 (pages 3/4 3-20 and 3-21).

Two footnotes associated with the AFW Pump response times were deleted when we prepared the final Technical Specification pages. While this was appropriate for the AFW Pumps, these footnotes also applied to items on the first (unchanged) page of the table. Therefore, the footnotes should not have been deleted.

Enclosure (1) includes the two-page table for both units, as it existed before amendments 149 and 130, and then page 3/4 3-21 for both units as it should have appeared when the amendments were issued.

We request that a corrected page 3/4 3-21 be issued for each unit. This correction in no way affects the amendments as we asked for them or the associated NRC Safety Evaluation Report. This was clearly an administrative error on our part.
