

November 5, 1990

A. Bert Davis U.S. Nuclear Regulatory Commission

Docket No. 030-19173 License No. 13-18881-02

Re: Reply to letter dated Nov. 2, 1990

Dear Mr. Davis:

According to Ammendment 10 of our license issued August 27, 1990, we are exempt from the need to develop a decommissioning funding plan or certification of financial assurance as described in 10 CFR 30.35. Also, please reference enclosed letter from Robert G. Gattone, Jr. which also verifies our exemption.

Sincerely,

a Miller

Director, Radiation Oncology

Memorial Hospital of South Bend

Gentlemen:

Enclosed is Amendment No. 18 to your NRC License No. 13-18881-01 in accordance with your request.

With regard to License Number 13-18881-01:

After review of your license we have determined that the type, form, and quantity of material authorized does not warrant the development and submittal of a decommissioning funding plan, or certification of financial assurance as described in 10 CFR 30.35 (enclosed). However, this does not relieve you of record keeping requirements relative to information which the Commission considers important to decommissioning. Therefore, we have added License Condition 15. requiring that you maintain such records as set forth in Section 30.35(q).

Please review the enclosed document carefully and be sure that you understand all conditions. You must conduct your program involving radioactive materials in accordance with the conditions of your NRC license, representations made in your license application, and NRC regulations. In particular, note that you must:

- 1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices, Instructions and Reports to Workers; Inspections." 10 CFR Part 20. "Standards for Protection Against Radiation," and other applicable regulations.
- 2. Possess radioactive material only in the quantity and form indicated in your license.
- Use radioactive material only for the purpose(s) indicated in your 3. license.
- Notify NRC in writing of any change in mailing address.
- Request and obtain appropriate amendment if you plan to change ownership 5. of your organization, change locations of radioactive material, or make any other changes in your facility or program which are contrary to your license conditions or representations made in your license application and any supplemental correspondence with NRC. Any amendment request should be accompanied by the appropriate fee specified in 10 CFR Part 170.

9011090158 (200)

- 6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
- Request termination of your license if you plan to permanently discontinue activities involving radioactive material prior to your expiration date.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations in yo license application will result in enforcement action against you in accordance with the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

If you have any questions or require clarification of any of the above stated information, contact us at (708) 790-5625.

Robert St. Hattene J.

Robert G. Gattone, Jr.
