

FEB 08 1991

Docket No. 50-002

Dr. Ronald F. Fleming, Director
Phoenix Memorial Laboratory
Ford Nuclear Reactor
University of Michigan
2301 Bonisteel Boulevard
Ann Arbor, Michigan 48109-2100

Gentlemen:

SUBJECT: REQUALIFICATION EXAMINATION REPORT NO. 50-002/OL-91-01

On January 7 and 8, 1991, the NRC administered requalification examinations to employees of your facility who operate the Ford Nuclear Reactor. The evaluation was conducted in accordance with NUREG-1021, Operator Licensing Examiner Standards, "Administration of NRC Requalification Examinations at Non-Power Reactors." The Examiner Standard used was preliminary and this examination was part of a pilot program designed to evaluate its effectiveness. From both the facility evaluator and the NRC examiner points of view the elements of the requalification examination process worked well.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosure will be placed in the Public Document Room.

Should have any questions concerning this examination, please contact me on 49-21031.

Sincerely,

for D.L. Lange

Robert M. Gallo, Chief
Operator Licensing Branch
Division of Licensee Performance
and Quality Evaluation, NRR
