SUMMARY

Scope: The areas given limited examination during this unannounced MC&A safeguards inspection included MC&A system management and assessment, measurement systems, measurement controls, and records and reports.

Results: Within the areas inspected, the following violation was identified: Failure to notify the NRC of changes to the approved FNMC Plan within the timeframe specified by 10 CFR 70.32(c). Two follow-up items from previous inspections were closed and one follow-up item remains open. Also four new follow-up items were opened and one health/safety concern was discussed with the licensee during this inspection.
