License No. 13-00951-04 Docket No. 03000188 A. Bert Davis, Regional Administrator US Nuclear Regulatory Commission, Region III 799 Roosevelt Road Gler Ellyn, Illinois 60137

Dear Mr. Davis:

We believe that we are exempt from the 10 CFR 30.35 requirement of a decommissioning funding plan for our cobalt-60 teletherapy operation on the grounds that it entails a single sealed source of less than 10,000 Curies.

Item 14 of our license (see attached) specifically exempts us from the funding plan requirement during source changes which would be the only time that our possession would exceed 10,000 Curies.

We do not anticipate ever having two separate cobalt-60 irradiation devices (ie. treatment units). However, if, at some future time we elect to purchase a second unit, we will establish a decommissioning funding plan before the second cobalt source is purchased.

Sincerely,

Mitchell Carson Vice President, Operations

enclosure

MATERIALS LICENSE SUPPLEMENTARY SHEET	Docket or Reference number 030-00188					
		Amendment	No. 14			
The licensee is exempted from decommissioning financial assurance requirements for possession of licensed material in sealed sources in quantities greater than the limits of 10 CFR 30.35(d) for the purpose of source changes only. This exemption is granted for no more than 30 days for any one source change.						
The licensee shall maintain records of information important to safe and effective decommissioning at Ball Memorial Hospital, Radiation Therapy Department, 2401 University Avenue, Muncie, Indiana per the provisions of 10 CFR 30.35(g) until this license is terminated by the Commission.						
16. This license is based on the licensee's stateme listed below:	nts and repr	resentations
