License No. 21-04127-02  
License No. 21-04127-06  
License No. 21-04127-07

Gentlemen:

This refers to the routine safety inspection conducted by Mr. J. L. Lynch of this office on January 24, 1991 of activities authorized by NRC Byproduct Material Licenses No. 21-04127-02, No. 21-04127-06, and No. 21-04127-07 and to the discussion of our findings with you and members of your staff at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions described in your letter dated December 5, 1988, regarding apparent violations found during our October 26, 1988, inspection. We have no further questions regarding these matters.

During this inspection, certain of your activities under License No. 21-04127-02 appeared to be in violation of NRC requirements, as specified in the enclosed Appendix and a written response is required. No violations were identified for Licenses No. 21-04127-06 and No. 21-04127-07.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosures, and your response to this letter will be placed in the NRC Public Document Room.

The responses directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
