Clinical Bldg. 169
541 Clinical Drive
Indianapolis, IN 46202-5111

Gentlemen:

Thank you for your letter dated January 2, 1991 informing us of the steps you have taken to correct the violations identified in our letter dated December 24, 1990.

In your response to item 2 of the Notice of Violation, you indicated the violation was not entirely correct in that only the laboratories of one permit holder were not posted in accordance with 10 CFR 19.11 not nine as stated in the Notice. In addition, you explained your procedure of posting at least one laboratory authorized under a given permit holder.

We agree that it is not necessary to post each laboratory provided that the information is readily observable to workers in accordance with Part 19 and your license requirements. Regarding the number of laboratories and/or permit holders in violation of the requirements, our inspector contends that the required postings and/or notices were not observed in the laboratories of Drs. Rosenthal, Zhou and Roman.

Your corrective action associated with both violations identified in the Notice is adequate and will be reviewed during a future inspection. No further response is required.

Your cooperation with us is appreciated.

Sincerely

William H. Schultz, Chief
Nuclear Materials Safety
