

U. S. NUCLEAR REGULATORY COMMISSIONTOLEDO EDISON COMPANY, ET AL.DOCKET NO. 50-346NOTICE OF ISSUANCE OF AMENDMENT TOFACILITY OPERATING LICENSE

The U. S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 153 to Facility Operating License No. NPF-3, issued to The Toledo Edison Company, Centerior Service Company, and The Cleveland Electric Illuminating Company (the licensee), which revised the Technical Specifications for operation of the Davis-Besse Nuclear Power Station, Unit No. 1 (the facility) located in Ottawa County, Ohio. The amendment was effective as of the date of its issuance.

The amendment allowed the main steam safety valve (MSSV) setpoints and the required minimum number of valves to be more consistent with the requirements of ASME Boiler and Pressure Vessel Code. It also redefined the relationship between the total operable MSSV relieving capacity per steam generator and the reduced Reactor Protection System High Flux Trip setpoint.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.
