Dear Mr. Shelton:

SUBJECT: DAVIS-BESSE NUCLEAR POWER STATION - GENERIC LETTER 89-19
 (TAC M87443)

The NRC staff's letter dated September 28, 1993, indicated that your response to Generic Letter 89-19, "Request for Action Related to Resolution of Unresolved Safety Issue A-47" was acceptable. The staff noted that the review of the technical specification change, adding surveillance testing for the steam generator high level trip, would be completed under TAC No. M87443.

The NRC staff finds acceptable your justification by letter dated December 16, 1993, for not completing your commitment to add overfill protection systems to the technical specification. TAC No. M87443 is closed by this letter. Our safety evaluation is enclosed.

Sincerely,

Original signed by

Garmon West, Jr., Acting Project Manager
 Project Directorate III-3
 Division of Reactor Projects III/IV
 Office of Nuclear Reactor Regulation

Enclosure:
