

MAY 16 1994

Docket No. 50-219

Mr. John J. Barton
Vice President and Director
GPU Nuclear Corporation
Oyster Creek Nuclear Generating Station
P.O. Box 388
Forked River, New Jersey 08731

Dear Mr. Barton:

SUBJECT: NRC Inspection No. 50-219/94-09

An announced inspection of your radiological controls program at the Oyster Creek Nuclear Generating Station was conducted by Mr. L. Eckert of this office on April 18 through April 22, 1994, of activities authorized by NRC License No. DPR-16. The inspection findings were discussed by Mr. Eckert with you and other members of your staff at the conclusion of the inspection on April 22, 1994.

Areas examined during this inspection were important to health and safety and are discussed in the enclosed inspection report. These areas included: quality assurance audits and surveillances, training (in radioactive waste and transportation requirements) and qualifications of personnel, the radwaste organization, implementation of the radwaste program, and radioactive material shipping records. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

The quality assurance and radwaste training programs were well implemented. The radwaste organization was staffed with a stable work force of well qualified individuals in the radwaste and transportation area. The radwaste program was, in general, well implemented.
