Dear Mr. England:

SUBJECT: TRANSMITTAL OF THE NRC SAFETY EVALUATION REPORT FOR THE  
BWR OWNERS' GROUP RESPONSE TO GENERIC LETTER 89-19

Enclosed is the NRC Safety Evaluation Report (SER) addressing the BWR Owners Group Response to Reactor Vessel Overfill Protection, Generic Letter 89-19. Based on the staff's review of the BWR Owners Group response and the cost/safety benefit analysis, the staff has concluded that upgrading existing automatic overfill protection systems to achieve additional separation is not warranted. The staff's findings and recommendations are documented in the SER. These findings will be utilized in completing our plant specific reviews for this issue.

Sincerely,
