MEMORANDUM FOR: D. L. Ziemann, Chief
 Operating Reactors Branch No. 2, DOR

FROM: D. M. Crutchfield, Chief
 Systematic Evaluation Program Branch, DOR

SUBJECT: SEP SAFETY ASSESSMENT INPUT FOR TOPICS III-6 AND III-II -
 DRESDEN 2 SEISMIC REVIEW REPORTS

SEE RPT

- References (1) NUREG/CR-0891, Seismic Review of Dresden Nuclear Power Station Unit 2 for the Systematic Evaluation Program, Senior Seismic Review Team, July 1979.
- (2) EGG-EA-5065, Summary of the Dresden Unit 2 Piping Calculations Performed for the Systematic Evaluation Program, M. E. Nitzel, INEL, November 1979.

We are attaching the referenced reports which will serve as the principal input for our final assessment for Topics III-6 and III-11 for the Dresden 2 plant. Please transmit these reports to the licensee for their information and review. The licensee should determine either that the information describing the plant is correct or in error.

On January 9, 1980 the NRC transmitted a letter to Commonwealth Edison Company (CECo) requesting that they address various open issues associated with the recently completed seismic review of Dresden 2. These issues were explained to CECo by the staff and staff consultants at an October 11, 1979 meeting. CECo responded on March 4, 1980 by saying that an item by item update would be forthcoming by March 17, 1980.

We have recently received a status report on each open item in a letter from CECo dated March 27, 1980. The licensee has provided additional information to address some of these items and has indicated his intended action on the remaining items. However, he has not provided a schedule for the submittal of his future actions. Rather than address each item in a piecemeal fashion, we would prefer to address all open items in one package (or at least most of them). Therefore, we request that you obtain from the licensee the schedule dates for their submittals that will address each item.
