Docket No.: 50-508

Mr. Nicholas D. Lewis, Chairman Energy Facility Site Evaluation Council (EFSEC) Olympia, Washington 98504

Dear Mr. Lewis:

Subject: Energy Facility Site Evaluation Council (EFSEC) Participation in the Nuclear Regulatory Commission Environmental Review of the Washington Public Power Supply System Nuclear Project No. 3 (WNP-3)

As you know, on Narch 15-16, 1983 the Nuclear Regulatory Commission staff will visit the MNP-3 site. This visit is part of the review process for preparing the environmental impact statement related to a recently tendered application for an operating license. It is of primary importance that all relevant environmental interests are given proper consideration during this review. To support that objective, the EFSEC is invited to attend this visit and provide input to the staff that identifies any specific items of environmental interest that should be included in the review.

The plan for the visit is for a site tour the first day to make observations of conditions where the WNP-3 and related structures have an interface with the surrounding environment. On the morning of the second day, there will be a meeting with the applicant for discussions of areas of interest that have developed during an environmental report acceptance review and the tour the proceeding day.

The EFSEC may have areas of interest that are in common with the interest of other agencies. An invitation with similar information is also being forwarded to:

U. S. Fish and Wildlife Service
USDA - Soil Conservation Service
U. S. National Marine Fisheries Service

I have been advised that the EFSEC has representatives from Washington:

Department of Game Department of Fisheries Department of Ecology Department of Natural Resources

8303140039 830304

Which will be contacted through Mike Mills of your organization.

DATE						
NDC FORM 318 (10-80) NBC	M 0240	OFFICIAL	RECORD C	OPY		USGPO: 1981-335-960

A copy of the meeting notice is enclosed for your planning. Those people interested in attending should contact the WNP-3 Project Manager, Ms. A. L. Vietti (301) 492-4449, not later than March 10, 1983. A press release was sent out by the US-NRC Region 5 offices on 3/2/83 concerning the meeting between the applicant and the NRC staff to discuss the staff's environmental review on March 16, 1983 from 8:00 am to 11:00 am where the public is invited to attend as observers. The second meeting in the press release is the meeting to be held to provide a forum for any member of the general public to have direct access to the staff to identify environmental areas of concern which will be held in the Grays Harbor County Pavillion at the county fair grounds in Elma, Washington, 7:00 pm - 10:00 pm, March 16, 1983. If you have any questions please feel free to contact Ms. A. L. Vietti.

Sincerely,

Original signed by:

George W. Knighton, Chief Licensing Branch No. 3 Division of Licensing

Docket No.: 50-508

MEMORANDUM FOR: George W. Knighton, Chief, Licensing Branch No. 3, DL

FROM:

Annette Vietti, Project Manager, Licensing Branch No. 3, DL

SUBJECT:

NOTICE OF MEETING FOR DISCUSSION OF INFORMATION FOR ENVIRONMENTAL REVIEW AND SITE TOUR - WASHINGTON PUBLIC POWER SUPPLY SYSTEM

PROJECT 3 (WNP-3) T

DATE & TIME:

March 15, 1983 - 9:00 am - 4:00 pm March 16, 1983 - 8:00 am - 11:00 am

LOCATION:

March 15 (Site Tour) - WNP-3 Plant Site

March 16 (Discussion) - WNP-3 Conference Room

PURPOSE:

March 15: To observe environmental conditions at selected

locations.

March 16: To discuss information for environmental review

of WNP-3 plant.

PARTICIPANTS:

NRC

T. Novak, A. Vietti, L. Wheeler, G. Lear, D. Chery, D. Gupta,

R. Samworth, C. Hickey, E. Pentecost, M. Kaltman, C. Campe,

J. Levine, R. Struckmeyer, D. Swanson

WNP-3

K. Cook, A. Moore, N. Kaufman, R. Leddick, G. Sorensen, J. Chasse,

J. Werle, D. Dobson, et al.

Annette Vietti, Project Manager

Licensing Branch No. 3 Division of Licensing

Enclosure: Agenda

cc: See next page

The meeting of March 16, 1983 is open to interested members of the public to attend as observers pursuant to NRC staff policy on open meetings. Members of the public wishing to attend should contact Mr. K. Cook, WNP-3 Project Manager, at (206)482-4428 x5436 by March 1, 1983, so that arrangements can be made for their attendance.

WNP-3 Environmental Review

Site Visit

Agenda

March 15, 1983 (9:00 AM - 4:00 PM)

A site tour will be made with the applicant and consultants. All review groups will tour the plant site. Individual review groups have expressed specific areas to be highlighted during the tour as follows:

Hydrologic & Geotechnical Engineering Branch (HGEB)

1. The intake and diffuser locations;

2. River gaging stations near the site on the Chehalis and Satsop Rivers;

3. The terrestrial ecology watersheds;

4. Reach of river from Purgatory Creek to Stevens Creek

Environmental Engineering Branch (EEB)

Terrestrial Resources :

- 1. Plant life existing that is expected to receive maximum salt drift deposition from cooling tower operations.
- Representative commercial forest and big game hunting areas within five miles of the site, and representative habitats for endangered species.
- 3. Erosion control
- 4. Revegetation following construction activities.

Aquatic Resources

- 1. Effects of plant operation on water quality, water level, and fish activity in surrounding creeks and rivers.
- 2. Intake and discharge areas and structures.

Radiological Assessment Branch (RAB)

Tour of radiological monitoring stations.

All persons to go on the tour are to meet inside the Site Construction Office Building at 9:00 AM. The specific route will be announced at that time. This meeting is expected to take no more than 20 minutes in order to allow the tour to begin in a timely manner.

March 16, 1983 (8:00 AM - 11:00 AM)

Discussions will be held between the NRC staff and the applicant. These discussions will encompass the questions that resulted from the review of the Environmental Report and other areas of interest developed during the site tour.

HGEB will review the following material to be provided by the applicant:

- Topographic maps of the major watersheds, local drainages, and the plant site;
- Aerial photographs of the site and Chehalis River in the vicinity of the intake and the diffuser. (Both vertical and oblique photographs if available);
- 3. Flood plain maps for the rivers and streams adjacent to the plant site;
- Flood and low flow records for those reaches of the Chehalis River adjacent to the plant and in the vicinity of the intakes and diffusers;
- 5. Rainfall and runoff records for the "Terrestial ecology" watersheds

RAB will review the applicant's health physics program with representatives from the health physics organization.

Other branches (i.e., EEB, SAB) will review responses to the questions they have submitted with technically qualified applicant representatives.
