Re: McGuire Nuclear Station
Docket No. 50-369

Dear Mr. Denton:

Attached are responses to the questions included in the March 2, 1983 letter by Elinor G. Adensam. These responses are to support NRC staff review of a proposed Technical Specification change for McGuire Unit 1 concerning reduced measurement uncertainty for RCS flow rate. We will be available to meet with the NRC staff to discuss this further, if necessary.

Please note that this submittal contains information proprietary to Westinghouse Electric Corporation. Accordingly, it is respectfully requested that the information which is proprietary to Westinghouse be withheld from public disclosure in accordance with 10 CFR Section 2.790 of the Commission's regulations. An Application for Withholding will be submitted later along with an affidavit signed by Westinghouse, the owners of the information, which will set forth the basis on which the information may be withheld from public disclosure by the Commission.

Very truly yours,

Hal B. Tucker
