

NOTICE OF VIOLATION

American Radiolabeled  
Chemicals, Inc.  
Maryland Heights, Missouri

License No. 24-21362-01  
Docket No. 030-20567

During an NRC inspection conducted on April 13-14, 1994, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C, the violation is listed below:

License Condition 23. of License No. 24-21362-01 references the letter dated October 1, 1992. Item 3.2.4.6 of the letter titled, Personnel Classifications, requires the licensee to limit the activities of Class 2 personnel who use radioactive materials, to use only under the supervision of a Class 1 individual.

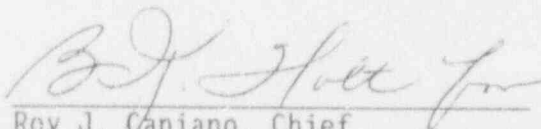

Contrary to the above, on March 12-13, 1994, and March 4, 1994, separate occasions involving separate individuals, the licensee allowed a Class 2 individual to use radioactive materials without supervision of a Class 1 individual.

This is a Severity Level IV violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, American Radiolabeled Chemicals, Inc. is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, Region III, 801 Warrenville Road, Lisle, Illinois, 60532-4351, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. If an adequate reply is not received within the time specified in this Notice, an order or a demand for information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

MAY 20 1994

Dated \_\_\_\_\_

  
Roy J. Galiano, Chief  
Nuclear Materials Safety Branch
