RE: Docket No. 030-32908, License No. 29-28784-01, Routine
Inspection No. 030-32908/93-002.

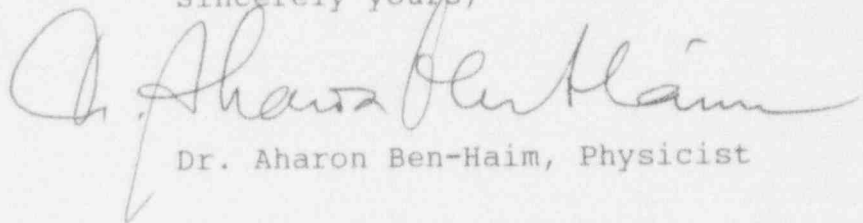

Dear Ms. Johansen:

The wipe test counter we are using in Dr. Shashi K. Agarwal's clinic is a Victoreen Model 05-578 Deluxe Wipe Test Counter, specified to meet NRC regulation requirements.

When I first took over, I was led to believe that this instrument only gave a Pass/Fail indication. This is why we thought of getting a digital reading using the ionization chamber. In the mean time, I learned that we can get a digital reading in dpm/100 sq.cm from the wipe test counter directly. This is the technique we have adopted.

Hoping this will satisfy Item K of the above Notice of Violation, I remain

Sincerely yours,

Dr. Aharon Ben-Haim, Physicist
