OPERATING LICENSE

The U. S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 82 to Facility Operating License No. DPR-50, issued to Metropolitan Edison Company, Jersey Central Power and Light Company, Pennsylvania Electric Company, and GPU Nuclear Corporation (the licensees), which added a license condition and revised Technical Specifications (TSs) for operation of the Three Mile Island Nuclear Station, Unit No. 1 (the facility) located in Dauphin County, Pennsylvania. The amendment is effective as of its date of issuance.

The amendment adds license condition 2.c.(7) which requires submitting an updated aircraft probability analysis sixty days following the 1984 report on aircraft movements at Harrisburg International Airport. Additionally, the amendment modifies TS 6.9.1.B.2.b concerning reporting of movements of aircraft larger than 200,000 pounds at Harrisburg International Airport. The revised TS 6.9.1.B.2.b requires the aircraft movements report to be broken down into scheduled and nonscheduled (including military) takeoffs and landings.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and

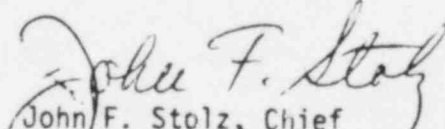

the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR §51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated November 30, 1982, (2) Amendment No. 92 to License No. DPR-50, and (3) the Commission's letter to GPU Nuclear Corporation dated March 1, 1983.
