Gentlemen:

This report is submitted pursuant to paragraph 35.43, Part 35, 10CFR.

On November 6, 1981 at approximately 0945 AM, 17 mCi of <sup>99m</sup>Tech-  
netium pertechnetate was inadvertently administered to a patient  
scheduled for a MDP bone scan. Results of nonlocalization in  
skeletal tissue caused the facts to appear. [ ] the  
referring physician, was notified. There was no adverse affect  
on the patient. The case was reviewed by physicians and technical  
staff and measures were proposed to avoid repetition.

Sincerely yours,

J.G. LLaurado, M.D., Ph.D.  
Acting Chief,  
Nuclear Medicine Service
