DOCKET 50-155 - LICENSE DPR-6 - BIG ROCK POINT PLANT - REPLY TO A NOTICE OF VIOLATION - NRC INSPECTION REPORT 94-005; RADIATION PROTECTION AND RADIOACTIVE WASTE SAFETY INSPECTION. NOTIFICATION OF A REVISED COMMITMENT DATE.

During the period March 7, 1994 through March 11, 1994, Mr. N. Shah of your office conducted a routine safety inspection at the Big Rock Point facility. NRC Inspection Report 50-155/94005 concluded that certain of Big Rock Point's activities appeared to be in violation of NRC requirements.

Pursuant to the direction required by the report, a Reply to the Notice of Violation was forwarded to the Nuclear Regulatory Commission by a letter dated April 18, 1994. To avoid further violations, Big Rock Point staff committed to update the Contractor Briefing book and outage handbook to include expectations for moving tools and equipment from the Radiological Controlled Area by June 1, 1994. The purpose of this letter is to advise the Commission that due to an unexpected large number of related procedural comments by reviewers, the original date of June 1, 1994 is unsupportable. The update will occur sometime before September 1, 1994. The Big Rock Point management staff believes that this date is reasonable, since the briefing book and outage handbook are required for the 1994 Refueling Outage scheduled for October 1, 1994.

On May 23, 1994, the Region III Section Chief was contacted by the Plant Safety and Licensing Manager, and apprised of the planned revision to the commitment date.
