CORPORATION
Crystal River Unit 3
Docket No. 80-302

May 24, 1994
3F0594-16

U.S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, D.C. 20555

Subject: Operating License No. DPR-72
Withdrawal of Exemption Request from Title 10 Code of Federal
Regulations, Part 50, Section 50.75

Reference: FPC to NRC, 3F0194-04, dated January 6, 1994

Dear Sir:

Florida Power Corporation (FPC) has had continuing dialogue with our Project Manager and with an industry group involved in the decommissioning funding area. As a result of those discussions, FPC hereby withdraws the referenced exemption request and will work toward a generic review of the decommissioning funding regulation and associated guidance.

One item that has come to light during our discussions is that, as a Southeast Compact member, FPC may use the in-compact costs and surcharges factor from NUREG-1307, "Report on Waste Burial Charges," for disposal costs of CR-3. The annual update using the December 1993 values will be completed when the labor and energy escalation values and the waste burial factor are available. By order of the Florida Public Service Commission, FPC will be developing an updated decommissioning cost study prior to December 31, 1994.

Sincerely,

P.M. Beard, Jr.
Senior Vice President
Nuclear Operations
