March 1, 1982

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
United States Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Denton:

Reference: Your letter of January 11, 1982 to E. P. Wilkinson

We are pleased with your comments on the program for the Significant Evaluation and Information Network (SEE-IN). The intent of the program is to assure intensive analysis and "lessons learned" from plant events, and also to provide a rigorous and cumulative body of this experience, fully accessible to all utilities.

Per your request, enclosed for your information is the latest revision of the SEE-IN program description document. The principal changes in this document are the arrangements for centralizing program management responsibility at INPO which was effective January 1, 1982.

Sincerely,

E. P. Wilkinson
E. P. Wilkinson
President
