Subject: Time Extension for Report - DER 81-43
A 50.55(e) Potentially Reportable Deficiency Relating
to Unit 1 Steam Generator Loose Internal Nuts and
Couplings
File: 82-019-026
D.4.33.2

Reference: (A) Telephone Conversation between J. Eckhardt and
G. Duckworth on November 23, 1981
(B) ANPP-19678, dated December 23, 1981 (Interim
Report)

Dear Sir:

The NRC was notified of a potentially reportable deficiency in Reference
(A) and an Interim Report was transmitted by Reference (B). At that time,
it was estimated that a Final Report would be available by March 4, 1982.

Due to the extensive investigation and evaluation required, it is now
expected that this information will be finalized by May 21, 1982, when a
complete report will be submitted.

There is no new information or change to the Interim Report at this time.

Very truly yours,

E. E. Van Brunt, Jr.
APS Vice President
Nuclear Projects
ANPP Project Director
