UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555

March 15, 1982

OFFICE OF THE  
COMMISSIONER

MEMORANDUM FOR: Executive Director for Operations ✓  
FROM: John Ahearne *J. Ahearne*  
SUBJECT: ENVIRONMENTAL QUALIFICATION OF ELECTRIC  
EQUIPMENT--JUSTIFICATION FOR CONTINUED  
OPERATION

In early February (see Secy 82-51) the staff identified eighteen plants for which it was still considering the justification for continued operation. The evaluation was to be completed by February 28, 1982. "Following the upgrading effort, licensees for which a positive finding cannot be made for the adequacy of the justification for continued operation would be issued an Order to Show Cause to establish a basis for continued operation."

If this schedule was met, the upgrading action should have been completed and decisions made concerning issuance of Orders to Show Cause.

Did all eighteen plants convince the staff there was adequate justification for continued operation? If not, please provide copies of the Orders to Show Cause which were issued.
