Without limiting the scope of this request, but merely to assist the NRC in its search, the written material should include:

- (b) All written materials concerning the status of completion, or estimates used for the Caseload Forecasts, in the possession of William Lovelace.
- (c) All written materials which quantitatively or qualitatively assess potential schedule impacts of current or anticipated licensing issues.

We expect to receive your response to this request within ten (10) working days.

We will pay search and copying fees as set out in the NRC's regulations. If the search and copying fees to be incurred are expected to exceed \$200.00, please notify the undersigned before this sum is exceeded.

In the event that access is denied to any part of the requested materials, please identify and describe the withheld or deleted materials in detail and specify the statutory basis for the denial, as well as your reasons for believing that an exemption applies. We also request that your description of the deleted or withheld materials include the title of the material, a description of its essence, the identify of its author, and the identities of any parties that have received copies or have had access to such materials. Please separately state your reasons for not invoking your discretionary powers to release the allegedly exempt materials.

Sincerely yours,
