Dear Mr. Ballard:

We have completed a search of the Natural Heritage Data System for information on significant natural features in the study area. At this time we do not have information in our files on special plant species' habitats or native plant communities in the immediate vicinity. If any of these features do occur in the study area, they have not yet been recorded in the Data System. Information on special animal species will be provided, under separate cover, by the Washington Department of Game, Nongame Program.

Please cite the Natural Heritage Data System, as follows, if this letter is referenced in publications or correspondence by your office.
