

JAN 19 1983

Docket: 50-285/82-21

Omaha Public Power District
ATTN: Mr. W. C. Jones, Division Manager
Production Operations
1623 Harney Street
Omaha, Nebraska 68102

Gentlemen:

This refers to the inspection conducted by Mr. R. Wise and Dr. J. B. Nicholas of this office during the period of October 11-15, 1982, of the activities authorized by NRC Facility Operating License DPR-40, and to the discussion of the findings by Dr. Nicholas with you and other members of your staff.

Areas examined during the inspection and our findings are discussed in the inspection report. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors.

Within the scope of the inspection, no violations or deviations were identified. However, as discussed at the conclusion of the inspection and noted in the enclosed inspection report, we are concerned about the high number of disagreements regarding confirmatory measurements performed on gaseous samples. Accordingly, you are requested to evaluate your present sampling and analytical program and respond, in writing, within 30 days of the receipt of this letter concerning your corrective action to reduce the number of disagreements to an acceptable level.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure will be placed in the NRC Public Document Room unless you notify this office, by telephone, within 10 days of the date of this letter and submit written application to withhold information contained therein within 30 days of the date of this letter. Such application must be consistent with the requirements of 2.790(b)(1).
