

July 1, 1982 through December 31, 1982

UNC Naval Products - Division of United Nuclear Corporation

Principal Radionuclides: ^{234}U and ^{235}U from Enriched Uranium

Curies

Liquid Effluent 4.9×10^{-3} Ci

(1.67×10^5 gallons released)

Gaseous Effluent 2.6×10^{-5} Ci

NOTES:

- (1) Specific activity factor used is 8.24×10^{-5} Curies/gram
- (2) Data reported is compiled from measurements taken at points of release on site and has not been adjusted by dilution factors which would be applied to calculate releases to unrestricted areas.
