

AUG 16 1982

MEMORANDUM FOR: Raymond F. Fraley, Executive Director  
 Advisory Committee on Reactor Safeguards

FROM: E. F. Goodwin, Technical Assistant  
 Technical Support Branch  
 Planning & Program Analysis Staff, NRR

SUBJECT: NRR RESPONSE TO ACRS RECOMMENDATIONS  
 FOLLOWING 264TH MEETING

In response to your memorandum dated July 8, 1982 which summarized actions, agreements, assignments, and requests, the following is provided on items assigned to NRR.

264th Meeting

1. No comment
2. System 80 Rapid Depressurization

The staff has requested CE and applicants using a System 80 NSSS to provide a detailed study of the costs, benefits, and risks involved in the use of direct depressurization and bleed and feed. This request was made a license condition on San Onofre 2 in August 1982. The report will be ready in September 1983.

3. Water Inventory Instrumentation

The staff believes its April 1982 presentation addressed the earlier concerns of the ACRS. It will report on the test program and integration with emergency operating procedures of the instrumentation for CE and Westinghouse in early 1983. The B&W design is still preliminary and will be discussed with the ACRS during the full power license review of Midland.

4. SER Supplements

In order that the ACRS be promptly and explicitly informed of new developments affecting safety, the committee is placed on distribution for all NRR board notifications. This is prepared within a short time, generally ten days after the staff identifies a novel matter of safety concern.
