

SEP 13 1982

Docket No. 50-220

Niagara Mohawk Power Corporation  
ATTN: Mr. T. E. Lempges  
Vice President  
Nuclear Generation  
300 Erie Boulevard West  
Syracuse, New York 13202

Gentlemen:

Subject: Inspection 50-220/82-01

This refers to your letter dated June 3, 1982, in response to our letter dated May 7, 1982.

Thank you for informing us of the corrective and preventive actions documented in your letter. These actions will be examined during a future inspection of your licensed program.

Through subsequent discussions with Mr. T. Roman and Mr. D. Matthews of your staff, we understand that the field check of the operating procedures will be completed by December 31, 1982 for valves inside non-high radiation areas and by the end of the next refueling outage for valves inside high radiation areas. The Phase I review, as described in your June 3, 1982 letter, will be completed by January 1, 1984. Please inform us by telephone and in writing if our understanding is not correct.

Your cooperation with us is appreciated.

Sincerely,

Original Signed By:

*[Handwritten Signature]*  
Richard W. Starostecki, Director  
Division of Project and Resident  
Programs
